How do I get past the scrolling movie that appears after creating a new character?

Vicki Almond - 2014-08-07 - in [Gameplay Questions](#)

This issue no longer occurs. It was resolved when a fix from the community was entered in the June 2017 MOULa update.

History: Several years ago we had to remove all Bink movies from MOULa at the request of RAD Game Tools - this was due to a licensing issue brought about by making the game open source. Using the "Esc" key allowed users to bypass this the intro movie.
