I didn't select all 7 of the games when I redeemed my code at GOG. Now, I am not able to access the rest of the games to download because I can't re-use my code. What do I do?

For this issue, GOG Support must be contacted so the code can be reset and the Backer who owns the code may redeem the remainder of the games that were not selected when the code was redeemed.

Note: Redeeming the code by selecting all the games (instead of only one or a few) simply places the games in the GOG library of your account.
