PSVR Update: Where is it? Why is it taking so long?

Lloyd Woodall - 2018-01-29 - in [PS4 / PSVR](#)

The PS4 PSVR Update for Obduction is still going through the VR certification processes with Sony.

The VR certification processes take considerable time and all our available resources are working to ensure Obduction navigates these successfully and as quickly as possible. Unfortunately, we have no control over Sony's schedule, the requirements to pass, or the time it takes for the process to complete.

We can only make the corrections Sony requires to get the game to pass cert, and we cannot comment or provide any details on the process.

Your continued patience and kind words are appreciated as we work very hard to get the update to you as soon as possible.
