When will the NVIDIA GeForce NOW free Beta codes be issued to those first 5,000 Backers?

Lloyd Woodall - 2018-06-05 - in MYST 25

For those unaware, to celebrate Myst's 25th Anniversary, NVIDIA provided us with exclusive codes to skip the waitlist and gain access to the GeForce NOW beta.

GeForce NOW transforms your Mac or PC into a high performance gaming rig by streaming your games from the cloud. This is an amazing service for lower end PC's and Mac's as well as just a great convenience for all computer gamers. GeForce NOW gives almost immediate access to your games library without the need to wait for game installs, patches or driver updates.

The sign-up to join the GeForce NOW beta will start after the Myst 25 Kickstarter campaign ends.

The first 5,000 of our Kickstarter backers to sign up will get beta codes after that. And if you don't make it into the top 5,000, you can still sign up with GeForce NOW to try out the service at a later date.

THE LATEST ON THIS: No codes have been issued yet.

When the Myst 25 digital downloads become available on GOG.com and Steam, more information regarding the NVIDIA GeForce NOW Free Beta codes will be available.

Thank you for your patience.
