When will the Steam version of Myst V be available on Mac?

Vicki Almond - 2013-10-31 - in [Myst V](#)

There currently is not a way to run Myst V natively on an Intel based Mac. However, Myst V can be played on an Intel based Mac using Bootcamp. Also, there are some third-party tools available that will run Windows while running Mac, but we can't guarantee that the game will perform as expected.
