How will the MYST book's LCD screen work? Does it run on rechargeable or replaceable batteries, or magic?

Lloyd W - 2021-10-19 - in [MYST \(25th Anniversary versions\)](#)

The linking panel screen is a 800x480 IPS LCD screen. It is powered by a Li-ion flat pack battery, er, *firemarble*, which is rechargeable via the included mini-USB cable.

Evidently, magic will play a big part in the process (but travel to other Ages is not guaranteed).
