I installed realMyst on my iPad and the intro sequence plays fine, but I can't get past the first linking screen. Instead of linking to Myst Island, the game crashes. How can I get past this?

realMyst is a large application and after installing realMyst, we recommend that you reboot your iPad. If you still experience crashing after rebooting your iPad, make sure that you have updated your iPad to the latest iOS.

If you still encounter crashing after trying these suggestions, please submit a support ticket or email support at support@cyan.com.
