MYST Patch Notes

Lloyd W - 2021-11-09 - in [Myst](#)

We're continuing to update Myst across all platforms as issues pop up and we're able to address them.

Sometimes updates for some issues take a long time to add a fix for - if an issue you have seen but have not seen addressed yet, thank you for your patience, a fix may yet be on its way!

To view the Patch Notes and see what issues have been addressed, please visit the [Discussion forum](#) (Link below) over on Steam.

If an issue is fixed there but has not been updated on your platform (i.e. Xbox, Viveport, MacOS, etc.), rest assured the update will be along as soon as it passed certification on the

store it's headed to (some stores verification takes longer than others)!
