On my Mac computer my game is not saving, and I can't see any saved games I had before. What do I do?

Lloyd W - 2021-10-19 - in General Information

Games not saving - or previously saved games not appearing - has been reported by many Mac users.

Some Mac owners have reported this solution, which has worked for everyone who's tried it.

Check the path below in your Mac:

System Preferences > Security & Privacy > Privacy > (scroll down to find) Files and Folders

Make sure the "Documents Folder" (under the game that is not saving) is enabled (the checkbox must be checked).

If the folder is *not* enabled, make sure to enable it, then try playing and saving the game.

If that fails to work, please check to ensure the computer's disk is not close to or at its maximum storage (an obvious, silly idea, yes, but in our experience often the obvious or silly is overlooked).
